UP TO 20% INCREASE IN PERFORMANCE

Engineered to deliver superior digging performance, longer wear life, and better protection for buckets and other high-wear components. Cat G.E.T. helps the machine penetrate tough material more easily, reducing fuel burn and stress on the loader arms and hydraulics. With durable tips, edges, and adapters designed specifically for backhoe applications, you get more productivity, less downtime, and lower long-term operating costs, job after job.

DEPENDABLE PROTECTION

Made from through-hardened DH-2 steel, both Cat G.E.T. tips and adapters of the Diagonal Retention System (DRS) deliver optimal strength and resistance to abrasive wear.
